Puppy Visit Safety & Health Guidelines

Hattie's Texas Cavapoos

We are excited for you to meet your puppy! Because young puppies are extremely vulnerable before they complete their vaccination series, we ask all visitors to help us keep our puppies healthy and safe by following these guidelines.

Before Your Visit

*Please do not visit if you or anyone in your household has recently been around a sick dog.

*Please do not visit pet stores, dog parks, shelters, grooming facilities, kennels, or other breeders in the 48 hours leading up to your visit.

*Please wear clean clothing and shoes when coming to our home.

*We will ask visitors to sanitize hands and either remove shoes or wear provided shoe covers.

During Your Visit

*Children must remain supervised at all times around puppies, and we may limit handling for safety purposes.

*Food and drinks are not permitted near the puppies.

*Please do not allow puppies on the ground outside of the designated safe areas.

Health & Safety Measures We Take

At Hattie's Texas Cavapoos, we work hard to provide a clean and healthy environment by:

*Following routine cleaning and sanitation protocols
*Limiting outside exposure before puppies are fully vaccinated
*Monitoring puppies closely for health and development
*Beginning age-appropriate deworming and vaccination schedules
*Socializing puppies in a safe and controlled environment

Visitors Understanding

By visiting our home and interacting with our puppies, visitors understand that:

*Young puppies can be sensitive to germs and stress.
*Safety protocals are in place to protect both the puppies and the visitors.
*We reserve the right to limit or end visits if safety guidelines are not followed.

Thank you for helping us protect the health and well-being of our puppies. We appreciate your cooperation and look forward to sharing this exciting experience with you!
